- FIGMA

WORK-EXPERIENCE

Data Anaylst / Online Engagement Intern

Memorial Centre of Entrepreneurship, St John's NL   *January 2021 - April 2021*

- Improved reliability of bi-weekly data analysis reports for decision-making by creating data collection and reporting tools using Python, MySQL, and Tableau.
- Equipped management to analyze multi-year data trends for 1000+ students registered with MCE since 2016.

PROJECTS

E-Commerce and Dashboard

Next.JS, Tailwind CSS, MySQL, Prisma, Clerk

- Fully responsive e-commerce website designed using Next.JS and Tailwind.
- Payments to be processed using Stripe, and user authentication by Clerk.
- Multi-store dashboard interface to keep track of inventory and sales, designed using Next.JS, Tailwind, MySQL and Prisma.
- Dashboard features light/dark modes for user preference.

My Portfolio

Next.JS, Tailwind CSS, TypeScript, Framer Motion

- Designed and developed a responsive portfolio website showcasing my professional skills and projects.
- Features include a clean and modern design, intuitive navigation, and a dynamic layout that highlights my work and achievements.
- Viewers can explore my portfolio in light/dark mode.

Tesla-Clone

React JS, Tailwind CSS

- Developed a dynamic and visually appealing Tesla website using React and tailwind, showcasing a responsive design for seamless user experience across various devices.
- Leveraged React's component-based architecture to ensure modular code and easy maintenance, resulting in an efficient and modern web presence for the restaurant.
